The Delignit AG receives first series contract for motor caravans

Blomberg, April 9, 2018. The Delignit AG (ISIN DE000A0MZ4B0), a leading manufacturer of ecological hardwood-based products and system solutions, has received a series contract for motor caravans from a well-known German OEM. The Delignit AG is to supply interior components for a new model coming onto the market. The first prototypes are to be delivered as early as 2018. The delivery of the interior components is expected to take place at an Eastern European location of the OEM. Series production of the model is scheduled to start in 2019 and is planned to run for a duration of 9 years.

With reference to the financial year 2021, in which this order is to be fully effective for the first time, sales potential can reach up to the double-digit million range, provided the non-binding quantity planning of the OEM customer on which the order is based is actually released. Over the term, the series supply contract based on the non-binding quantity planning of the OEM customer has a sales potential in the high double-digit million range.

With the first series contract for motor caravans, Delignit AG is laying the foundation for the transfer of its successful business model to another business segment.

About the Delignit Group:

The Delignit Group develops, produces and sells ecological materials and system solutions from renewable raw materials under the brand name Delignit. As a recognized development, project and series supplier of leading automotive groups, the Delignit Group is, among other things, world market leader for supplying the automotive industry with load compartment protection and load securing systems for light commercial vehicles. With an industry-wide variety of applications and manufacturing range, the Delignit Group serves numerous other technology sectors, for example: as a worldwide system supplier of reputable rail stock manufacturers. The Delignit solutions have exceptional technical properties and are further, among other things, used as car boot floors, special floors for manufacturing and logistic facilities as well as to improve the safety standard of buildings.

The Delignit material is predominantly based on European hardwood, is CO₂ neutral in its life cycle and therefore ecologically superior to non-regenerative materials. The use of the Delignit material therefore improves the environmental performance of customer products and meets their increasing ecological requirements. The company was founded over 200 years ago. The Delignit AG is listed in the stock exchange Segment Scale of the Frankfurt Stock Exchange.
